Card Design

With BadgeBuilder® Express, you can quickly produce attractive ID cards using one of the pre-configured card designs - or custom create your own single-sided card design.

BadgeBuilder® Express comes with a variety of design tools which enable users to add bar codes to card designs, import graphics for backgrounds, and add logos and text. Users are also able to make global edits to card layouts and BadgeBuilder® Express will automatically adjust card layout printer settings.

Photo Capture

With the ability to apply photos which are scanned, captured live or imported from a file, BadgeBuilder® Express simplifies the task of adding a photo to a card record. Automated photo capture tools make your card look perfect every time.

Data Management

With flexible sorting and Fast Find search capabilities, BadgeBuilder® Express quickly locates the record you need for rapid re-printing.

Printing

Complemented with full color cards, multiple cards per sheet, bitmap graphics and many bar codes styles, BadgeBuilder® Express is a simple yet powerful ID creation application.

BadgeBuilder® Express is based on proven technology from the BadgeBuilder® Family of Badging Products.

Small and medium-sized businesses now have an affordable solution for badging their employees, contractors, vendors and more. With its powerful, easy-to-use interface, BadgeBuilder® Express opens the door for those on a budget to create exceptional photo ID's at an exceptional price!
